### WHAT IS RFID?

Radio Frequency Identification technology uses radio waves to communicate information. All a crook needs is an RFID reader and to stand next to you to steal your info.

Our silicone SmartWallet sandwiches a plate in the front flap that jams RFID waves, keeping your information safe.

BLACK BLUE GREEN NAVY ORANGE RED WHITE

Works with most newer Apple, Samsung and Android smartphone devices. Includes a diode which prevents voltage from being kicked back from the fan to protect the device. This is a very important safety feature some lower cost fans do not have. Some phone cases prevent the fan from plugging in completely. Before returning the fan, remove the case and try it again. From research, cell phone retailers have found that most users frequently overcharge their phones. This reduces the life of the battery and/or the capacity. The fan must have a fully-functional battery to operate properly.
